

WaterADE is a powdered vitamin drink available in eight popular flavours, which when diluted, is very similar in looks, taste and smell to that of real fruit juices.

Benefits of WaterADE

- WaterADE is a brand new product which has been specifically developed for use within healthcare.
- WaterADE's three superior qualities are its looks, its scent and its taste. These are of course the three key elements to what makes a drink appealing. As a result of what has been achieved in its development, WaterADE should encourage your residents to consume more fluid.
- WaterADE contains four essential vitamins; C, A, D and E. Much can be written about each one, but all were selected as being beneficial to those in care. In particular, vitamin 'D', as deficiency is often common in care home residents.
- WaterADE is both Sugar and Gluten-free. It contains no preservatives and all colourings and flavourings are entirely natural. Natural Stevia has also been used as its core sweetener.

Our WaterADE Starter Pack* is just
£69.00 including VAT

and consists of eight boxes of 24 sachets (192 sachets in total) plus one jug.

For all other orders: Minimum order is one carton consisting of 12 boxes. Each box contains 24 sachets, each carton 288 sachets and costs...
